

## SureGrip Sure Switch

With the Sure Switch directional control you can **operate your vehicle's peripheral driving functions** at the touch of a button!

Designed to **complement the Sure Grip Hand Control**, the Sure Switch allows you to control the following functions with just the tip of your finger:

- Headlights (on/off & dim/bright)
- Park lights (on/off)
- Turn signals
- Hazard flashers
- Horn

Add a second switch to operate your:

- Washer/wipers
- Or, virtually any other peripheral function!

### Revolutionary Technology

- Finger-operated
- Approximately the size of a roll of quarters with a 4-way mini-joystick on top
- Intelligent turn signals
- Does not disable original equipment
- State-of-the-art micro-controller
- Easily activated without compromising full control of acceleration, braking or steering
- Heavy-duty, 30-amp delays

### Who Uses Sure Switch?...

...Any driver with a disability who wants to operate secondary functions without sacrificing driving control and safety.
